

Sinteso™

Detector base and accessories

FDB22x, FDB20x, FDB2x1-AA, DBZ1190-Ax, FDBZ295, FDBZ291, DBZ1193A, FDBH291, FDBZ293, FDB2x1, FDB29x, FDUD290, DBZ1194, FDBZ294, FDZ291

Addressed (FDnet), collective

- Base made from impact-resistant and scratch-resistant plastic
- Screwless connection terminals enable connection without any tools (spring clip principle)
- FDB2x1-AA incl. 1 micro terminal
- Completely covered by detector
- FDB201, FDB201-AA, FDB221, FDB221-AA for recess-mounted or surface-mounted cable entry
- FDB202, FDB222 for flush mounting
- Accessories for surface mounting, in humid or wet environments, theft protection, impact protection, dust protection, location inscription, and detector heating unit when there is a risk of moisture condensation or icing, seal for higher protection category
- Version for addressed or collective fire detectors

Features

- Universal base suitable for surface-mounted and recess-mounted supply lines
- Extra-long mounting slits allow existing drill holes from older systems to be reused
- A large opening in the detector base makes it easy to feed the cables through
- The detector line can be connected without any tools: The wire can be inserted easily by hand
- Loop contact
- Space for auxiliary terminals, for the connection of two alarm indicators, cable shielding, or the connection of a detector heating unit
- Designation plate:
 - For easy identification of point detectors
 - Can be mounted on detector bases and base attachments

- 1 Base attachment FDB291
- 2 Designation plate FDBZ291
- 3 Designation plate DBZ1193A
- 4
 - Base attachment humid FDB293
 - Base attachment wet FDB295
- 5
 - Detector base FDB2x1
 - Detector base incl. 1 micro terminal FDB2x1-AA
 - Flat detector base FDB2x2

Eco-friendly

- Environmentally friendly processing
- Reusable materials

Collective detector base FDB201 / FDB201-AA

Function:

- Detector base with stilts for fire detectors with collective signal processing
- 'Gray' connection terminals, 0.2...1.5 mm² conductor cross-section
- FDB201-AA also contains micro terminal DBZ1190-AA

Use:

- For recess-mounted cable entry
- For surface-mounted cable entry up to a cable diameter of 6 mm

Addressable detector base FDB221 / FDB221-AA

Function:

- Detector base with stilts for fire detectors with addressable signal processing
- 'Orange' connection terminals, 0.2...1.5 mm² conductor cross-section
- FDB221-AA also contains micro terminal DBZ1190-AA

Use:

- For recess-mounted cable entry
- For surface-mounted cable entry up to a cable diameter of 6 mm

Flat, collective detector base FDB202

Function:

- Flat detector base for fire detectors with collective signal processing
- 'Gray' connection terminals, 0.2...1.5 mm² conductor cross-section

Use:

- For flush mounting; only for recess-mounted cable entry

Flat, addressable detector base FDB222

Function:

- Flat detector base for fire detectors with addressable signal processing
- 'Orange' connection terminals, 0.2...1.5 mm² conductor cross-section

Use:

- For flush mounting; only for recess-mounted cable entry

- 1 FDB2x1 / FDB2x1-AA
- Base height: 22 mm
 - When using the point detector: 54 mm
- FDB202 / FDB222

- Base height: 17 mm
 - When using the point detector: 49 mm
- 2 Mounting slits
 - 3 Loop contact
 - 4 Screwless connection terminals
 - 5 Opening for cable entry

DBZ1190-AA micro terminal and DBZ1190-AB connection terminal

- Micro terminal DBZ1190-AA
 - Cable cross section up to max. 0.5 mm²
- Connection terminal DBZ1190-AB
 - Cable cross section up to max. 2.5 mm²
 - For connecting two external alarm indicators or the cable shielding

- 1 Detector base FDB2xx / FDB2x1-AA
- 2 Micro terminal DBZ1190-AA
- 3 Connection terminal DBZ1190-AB

Sealing element FDBZ295

Function:

- For improving the protection category. However, detectors can no longer be installed or removed using the detector exchanger.

Note: Cannot be used in conjunction with designation plate FDBZ291!

Designation plate FDBZ291

- For labeling with the location address
- Can only be used without sealing element FDBZ295

Designation plate DBZ1193A

- For labeling with the location address
- Can only be used with base attachment wet FDB295 or base attachment humid FDB293

Detector heating unit FDBH291

- For operating point detectors in critical ambient conditions during icy conditions or when there is a danger of moisture condensation. Examples of application: Cold stores, attics, loading ramps, cheese cellars
- Optimum function is only guaranteed in conjunction with base attachment wet FDB295 or base attachment humid FDB293.
- The point detector temperature increases by approximately 2 °C over the operating temperature and thus avoids moisture condensation on the detector.
- Mounted quickly: The detector heating unit clicks into place in the detector base.

- 1
 - Base attachment humid FDB293
 - Base attachment wet FDB295
- 2 Detector base FDB2x1 / FDB2x1-AA, FDB2x2
- 3 Detector heating unit FDBH291
- 4 Connection terminal DBZ1190-AB
- 5 Micro terminal DBZ1190-AA

Detector locking device FDBZ293

- For protection against theft of the point detector
- Set screw M3 x 6 mm prevents the point detector being unscrewed from the detector base
- Point detector can only be removed with the appropriate Allen key

- 1 Set screw
- 2 Allen key

Base attachment FDB291

Function:

- For routing surface-mounted cables larger than Ø 6 mm
- Detector base is secured with a snap fastener

- 1 • Base height: 25 mm
- When using the point detector: 60 mm
- 2 Opening for cable entry
- 3 Mounting slits

Base attachment humid FDB293

- For achieving a higher protection category
- For mounting in wet or humid environments
- Required when using detector heating unit FDBH291
- Required when using protective cage DBZ1194 or EMC-protective cage FDBZ294
- Mounted between detector base and ceiling
- Detector base mounted quickly: The detector base simply clicks into place in base attachment humid FDB293.

Base attachment wet FDB295

- Base attachment wet with additional integrated rubber seal for mounting in wet or humid environments
- For achieving a higher protection category
- For mounting in wet or humid environments
- Required when using detector heating unit FDBH291
- Required when using protective cage DBZ1194
- Mounted between detector base and ceiling
- Detector base mounted quickly: The detector base simply clicks into place in base attachment wet FDB295.

Base adapter FDB241

Function:

- For adapting AnalogPLUS and SIGMALOOP for Sinteso detector systems
- Can be set with jumper on replaced detector

- 1
 - SPF3600 detector base (SIGMALOOP)
 - DB1131A detector base (AnalogPLUS)
- 2
 - Base height: 29.5 mm
 - When using the point detector: 74.5 mm
- 3 Adapter incl. detector base, 'orange' connection terminals

Base adapter FDB251

Function:

- For adapting Interactive for Sinteso detector systems
- Can be set with jumper on replaced detector

- 1 DB1151A detector base (interactive)
- 2
 - Base height: 29.5 mm
 - When using the point detector: 74.5 mm
- 3 Adapter incl. detector base, 'orange' connection terminals

Base adapter FDB281

Function:

- For adapting MS8/PMT for Sinteso detector systems

- 1 Detector base Z84 (MS8/PMT)
- 2
 - Base height: 37 mm
 - When using the point detector: 73 mm
- 3 Adapter incl. detector base, 'orange' connection terminals

Base adapter FDB299

Function:

- For adapting AlgoRex (collective) and SIGMACON for Sinteso detector systems

- 1
 - DB1101A detector base (collective, AlgoRex)
 - SPF600 detector base (SIGMACON)
- 2
 - Base height: 29.5 mm
 - When using the point detector: 74.5 mm
- 3 Adapter incl. detector base, 'gray' connection terminals

Removal tool for adapter FDUD290

Function:

- For removing base adapters FDB2xx with detector exchanger, detector exchanger and tester, or detector tester

- 1 Detector base
- 2 Base adapter FDB241, FDB251 or FDB299
- 3 FDUD290 removal tool for adapter
- 4
 - FDUD291 detector exchanger
 - FDUD292 Detector exchanger and tester
 - FDUD293 intelligent detector tester

Protective cage DBZ1194

- To protect the point detector from damage
- Can only be mounted in combination with the base attachment humid FDB293 or base attachment wet FDB295

- 1 • FDB293 base attachment humid
• FDB295 base attachment wet
- 2 Screw
- 3 Protective cage DBZ1194

EMC-protective cage FDBZ294

- To protect the point detector from strong electromagnetic fields
- Can only be mounted in combination with the base attachment humid FDB293 or base attachment wet FDB295

- 1 • FDB293 base attachment humid
• FDB295 base attachment wet
- 2 Screw
- 3 Protective cage FDBZ294

Detector dust cap FDZ291

- To cover detectors as protection against dust during the construction phase

- 1 Point detector
- 2 Detector dust cap FDZ291

Type Overview

Type	Designation	Order no.	Weight [kg]
FDB201	Detector base collective	A5Q00003814	0.026
FDB202	Collective detector base, flat	S54319-F3-A1	0.025
FDB201-AA	Collective detector base incl. 1 micro terminal DBZ1190-AA	A5Q00012742	0.029
FDB221	Detector base, addressable	A5Q00001664	0.026
FDB222	Addressable detector base, flat	S54319-F1-A1	0.025
FDB221-AA	Detector base, addressable incl. 1 micro terminal DBZ1190-AA	A5Q00012741	0.029
Accessories

FDZ291	Detector dust cap	A5Q00004814	0.003
–	Metal cable gland M20 x 1.5	A5Q00004478	0.036

Disposal

The device is considered an electronic device for disposal in accordance with the European Guidelines and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Technical data

Detector base

Conductor cross-sections:

• Connection terminals in the base	0.2...1.5 mm ²
• Connection terminals DBZ1190-AB	0.5...2.5 mm ²
• Micro terminals DBZ1190-AA	0.28...0.5 mm ²
Operating temperature, storage temperature, air humidity, protection category (IEC 60529)	You will find information in the following documents: • 007005 • 007850 • 008141
Color	~RAL 9010, pure white

Detector heating unit FDBH291

Operating voltage (normal operation)	DC 20...30 V
Operating current	35...55 mA
Operating temperature	-30...+40 °C
Storage temperature	-30...+60 °C

Dimensional drawings

Technical drawings of the A8C00058324A-PO-GP20-2 camera module. The drawings include a top view, a side view, and a detailed view of the mounting bracket. The top view shows a square module with a central lens and a mounting bracket with four screws. The side view shows the module's profile with a height of 61mm. The detailed view shows the mounting bracket with dimensions 135mm x 135mm and 107.8mm x 107.8mm. A note indicates B = Ø 4.3.

[illegible]

Technical drawing of the round table showing top and side views with dimensions:

- Top View:** Shows a circular table with a diameter of $\varnothing 158.5$. The drawing includes a dashed center line and four small rectangular details (likely feet or casters) positioned at the top, bottom, left, and right.
- Side View:** Shows the table's profile with a total height of 126. The width of the table top is 142, and the width of the base is 161.7. The drawing includes a dashed center line and two small rectangular details (likely feet or casters) positioned at the top and bottom.
